

Microbiotix Research & Development Capabilities

Entry Points for Collaboration

Microbiotix, Inc. has over 10 years of experience working with collaborators in all phases of antibacterial and antiviral drug discovery. Microbiotix has:

- Written successfully funded NIH grant and DoD contract proposals with dozens of academic collaborators
- Developed hits and leads to preclinical and clinical candidates
- Two compounds currently in preclinical trials and two in clinical studies
- Published results rapidly, with dozens of publications in quality journals

If you work in these areas, consider how Microbiotix' capabilities can provide key results to accelerate your project.
